## Electrolyte compensator for poultry and pigs

### What is **TERMO-STRESS aqua**?

Is a liquid supplement added to the drinking water of poultry, pigs, and other domestic animals. It contains a blend of vitamins and electrolytes to help these animals compensate for losses during extreme heat events, thermal stress, and/or stress caused by transportation, intensive handling, or sudden temperature changes.

**TERMO-STRESS aqua** aqua can be used as an electrolyte corrector, anti-thermal stress agent, and immune protector.

### Ingredients:

Potassium Chloride, Magnesium Chloride, Magnesium Citrate, Sodium Bicarbonate, Sodium Chloride, Pyridoxine, Cyanocobalamin, Thiamine, Niacin, Vitamin C, Betaine, and excipients.

Use **TERMO-STRESS aqua** according to the following table:

Species/Event	Stage	Dosage (ml/liter of water)
Layers & Breeders	Post-vaccination effects	0,75-1 ml/liter
	Heat stress	1,0 ml/liter
	Therapeutic accompaniment	0,5 ml/liter
Broilers	Post-vaccination effects	2-4 ml/liter
	Heat stress	1,0 ml/liter
	Transport to slaughterhouse	0,5 ml/liter
	Therapeutic accompaniment	0,5 ml/liter
Pigs	All stages	0,5-1 ml/liter

## Description:

**TERMO-STRESS aqua** aqua compensates electrolyte losses in animals, mitigating harmful effects such as cardio-respiratory problems, appetite loss, muscle tetany, cramps, heat, cold, or ammonia stress, and fluid accumulation in cavities. This reduces mortality caused by heart attacks.

During hot days, **TERMO-STRESS aqua** corrects the excessive expenditure of minerals, electrolytes, and vitamins, providing the animal with a sense of thermal comfort.
